

What Waikiki dirt actually trades for

Ten years of land and land-heavy transactions inside the Waikiki Special District, reduced to one number you can underwrite against: **dollars per square foot of land**. Every figure is sourced, and every figure is marked with how much weight it can carry.

BOUNDARY	WINDOW	BASIS	PRIMARY COMPS	COMPILED
Waikiki Special District	Aug 2016 – Aug 2026	Land value extracted	4 fee / leased fee	19 Aug 2026

01

The bottom line

Four arm's-length land sales inside the district carry this study. Together they moved 646,389 square feet of Waikiki land for \$850 million.

AREA-WEIGHTED LAND VALUE \$1,315/sf Total dollars ÷ total land area across the four primary comps. The single most defensible number here.	MEDIAN COMP \$1,600/sf Midpoint of the four. Runs high because two of the four are small parcels.	OBSERVED RANGE \$1,137–2,000 Low: the 10.3-acre Royal Hawaiian block. High: a 33,500 sf corner on Kalakaua.	LAND APPRECIATION 9.5%/yr Bank of Hawaii Waikiki Center ground: \$119/sf in 1995 → \$2,000/sf in 2026. Same dirt, 31 years.
--	---	---	---

Three findings matter more than the headline average, and they should shape how you use this study.

FINDING 01 – PARCEL SIZE DRIVES PRICE MORE THAN DATE DOES

Across the four primary comps there is no usable time trend. A 2019 sale (\$1,791/sf) sits above a 2025 sale (\$1,137/sf). What separates them is size and frontage, not the calendar. Small parcels on Kalakaua clear near \$2,000/sf; ten-acre blocks clear near \$1,150/sf. **If your parcel is under ~35,000 sf, the small-lot comps govern — not the headline average.**

FINDING 02 – THE HAWAIIAN TRUSTS ARE THE SELLERS

Kamehameha Schools and Queen Lili‘uokalani Trust are on the sell side of three of the four primary comps (\$783M of the \$850M). Buyers are overwhelmingly Japanese and Korean institutional capital plus U.S. ground-lease REITs. This is a structural rotation of Waikiki's fee ownership, not a series of one-off trades — which means more leased-fee product is likely to come to market.

FINDING 03 – NEARLY EVERY COMP IS A LEASED-FEE SALE

All four primary comps conveyed land *already encumbered by a long-term ground lease*. That is not the same asset as a clean, deliverable, developable site. A leased-fee buyer purchases an income stream and a reversion; a developer buys the right to build now. Depending on the lease's rent and remaining term, unencumbered fee land can be worth meaningfully *more* than these figures, and a below-market ground lease makes it worth *less*. **There is no verified vacant, unencumbered, ready-to-develop land sale in the district in the ten-year window.**

02

What this is, and what it isn't

Read this before you put any of these numbers in front of a lender or a partner.

DATA PROVENANCE – READ THIS

This study was compiled from **published transaction reporting**: trade press, seller press releases, SEC filings, and news coverage of recorded deeds. It was **not** compiled from primary records. Direct access to the City & County Real Property Assessment Division, the Hawaii Bureau of Conveyances, and the HoLIS parcel/zoning GIS layers was blocked by network policy in the environment this was built in.

Consequence: **land areas, TMKs, and closing dates carry the confidence of a news report, not a title search.** Section 09 lists exactly what to pull to convert this from a well-sourced desktop study into something an appraiser or a lender will underwrite. No figure below is invented — but several are single-sourced, and they are marked.

Boundary. The Waikiki Special District as adopted in the Land Use Ordinance: the Ala Wai Canal on the mauka and Ewa sides, Kapahulu Avenue on the Diamond Head side, and the ocean makai. One transaction in the table (the Gold Coast

boutique hotel at 2885 Kalakaua) sits *outside* that line and is flagged and excluded from every conclusion.

What counts as a comp. You asked for land value extracted from all sales including improved property, which is correct for this market — Waikiki has effectively no vacant land. The comps are graded into three classes:

CLASS	WHAT IT IS	HOW IT'S USED
LAND	Fee or leased-fee interest in the land itself conveyed separately from the building.	Primary. These four drive every conclusion. \$/sf is a true land rate.
IMPROVED	Land and buildings conveyed together in one price.	Ceiling test. \$/sf of land includes the building, so it sets an upper bound on land, never a land rate.
LEASEHOLD	Only the tenant's interest under a ground lease conveyed. No land changes hands.	Excluded from valuation. Shown for market context and ownership history only. Dividing these prices by land area produces a meaningless number.

FEE SIMPLE VS LEASED FEE – COMPANION NOTE

Every primary comp below conveyed a **leased fee**: the landowner’s half of a ground lease, not clean unencumbered land. A separate note explains the difference, shows the Hawaii convention linking ground rent to land value, and provides a converter that turns any leased-fee price here into its fee simple equivalent — The Ground Lease Split. The **Interest** column in the table records what changed hands in each row.

Extraction. Where a sale is improved, no depreciated-cost allocation has been run — that requires building cost and condition data not available here. The improved figures are therefore presented as gross \$/sf of land *with the building included*, which is why they read *lower* than the pure-land comps rather than higher: the improved assets in this sample are older, functionally dated buildings on interior blocks.

Where they are

Every transaction, keyed by number to the table below. Click any marker to jump to its row; hover a row to find it on the map.

Positions are plotted from street address along the Kalakaua / Kuhio address grid and are approximate. This is an orientation diagram, not a survey plat — do not scale distances or infer parcel boundaries from it.

The transactions

Sorted by dollars per square foot of land, descending. Confidence ticks reflect how well-sourced each row's land area and price are.

#	PROPERTY & ADDRESS	CLASS	INTEREST	CLOSED	PRICE	LAND SF	\$ / SF LAND	SELLER → BUYER	NOTE
1	Bank of Hawaii Waikiki Center — ground 2155 Kalakaua Ave at Beach Walk	LAND	Leased fee → merged	27 Mar 2026	\$67.0M	33,500	\$2,000	Kapuahealani LP → Shoei Global (Shoei USA affil., Japan)	Leased fee under ~83% of the building, bought by the building's own owner. Two adjacent parcels. Seller acquired the ground in 1995

#	PROPERTY & ADDRESS	CLASS	INTEREST	CLOSED	PRICE	LAND SF	\$ / SF LAND	SELLER → BUYER	NOTE
									for ~\$4M. Treat as an upper bound — a lessee buying its own fee pays marriage value.
2	‘Alohilani Resort — ground 2490 Kalakaua Ave	LAND	Leased fee	25 Sep 2019	\$195M	108,900	\$1,791	Queen Lili‘uokalani Trust → Safehold Inc. (iStar-managed ground-lease REIT)	Leased fee under the 839-room ‘Alohilani. Oceanfront Kalakaua frontage — the strongest location in the primary set.
3	Hilton Waikiki Beach — ground 2500 Kuhio Ave	LAND	Leased fee	27 Aug 2019	\$78.0M	55,321	\$1,410	Queen Lili‘uokalani Trust → HWB Hawaii LLC	Leased fee. Same seller and same year as ‘Alohilani but two blocks mauka with no beach frontage — the cleanest location comparison available.
4	The Royal Hawaiian — ground 2255 Kalakaua Ave	LAND	Leased fee	6 Nov 2025	\$510M	448,668	\$1,137	Kamehameha Schools → Daisho Co. Ltd (Tokyo)	Leased fee under the hotel, which Kyo-ya continues to own on a long-term ground lease. Largest parcel in the set and the lowest rate — the size discount in its clearest form. One source reports 10.0 acres, which would lift the rate to \$1,171/sf.
13	Ambassador Hotel Waikiki (6 parcels) 2040 Kuhio Ave — pre-dates the window	EXCLUDED	Fee (improved)	2014	\$71.5M	67,229	\$1,064	Ambassador Hotel Inc. → Walton Street Capital (Chicago)	Six parcels totalling 67,229 sf including a 26,470 sf hotel. Closed in 2014, before the ten-year window, so excluded from conclusions — but the best available read on a Kuhio Ave assemblage rate, land and buildings together.
5	Hilton Hawaiian Village — 2 adjacent parcels Kalia Rd vicinity	LAND	Fee (improved)	Mar 2023	\$18.0M	—	—	Undisclosed → Park Hotels & Resorts	Land and improvements assembled for a planned additional tower. Land area not disclosed in any source found, so no rate can be derived.
6	Waikiki Trade Center 2255 Kuhio Ave at Seaside Ave	IMPROVED	To verify	Date to verify	\$8.2M	—	—	Undisclosed → Seaside Equity LLC (Delaware)	Office and retail tower. Buyer planned mechanical and finish upgrades. Neither closing date nor land area confirmed — flagged for verification.
7	Studio apartment building (3-storey, 69 yrs) Kuhio Ave	IMPROVED	Fee (improved)	Mar 2026	\$4.2M	—	—	Undisclosed → Owner of the adjoining property	Assemblage purchase by a neighbour, raising the prospect of redevelopment. Land area not reported — worth pulling, as a small

#	PROPERTY & ADDRESS	CLASS	INTEREST	CLOSED	PRICE	LAND SF	\$ / SF LAND	SELLER → BUYER	NOTE
									interior parcel would be the closest thing in this study to an Apartment Precinct comp.
8	Polynesian Plaza (leasehold) 2131 Kalakaua Ave	IMPROVED	Leasehold	Oct 2016	\$10.6M	14,058	—	Sandpiper Acquisition LLC → L.A. Koreana Inc. (Koreana Hotels & Resorts, Seoul)	Leasehold interest only in a 56-unit boutique hotel with ~7,500 sf of ground-floor retail. The 14,058 sf is the leasehold land beneath it — no land was conveyed, so no \$/sf is shown.
9	Aston Waikiki Beach Hotel (leasehold) 2570 Kalakaua Ave	IMPROVED	Leasehold	Mar 2018	\$200M	—	—	Xenia Hotels & Resorts → Undisclosed	Leasehold interest in a 693-room hotel. Context for the resort market; no land conveyed.
10	Hyatt Regency Waikiki (leasehold) 2424 Kalakaua Ave	IMPROVED	Leasehold	Jun 2016	\$756M	—	—	Blackstone Group → Mirae Asset Global Investments (Seoul)	Leasehold only. Blackstone had paid \$445M in 2013. Transferred again in Sept 2025 for an undisclosed nine-figure sum; 2026 reporting put negotiations near \$650–680M.
11	Queen Kapiolani Hotel (leasehold) 150 Kapahulu Ave	IMPROVED	Leasehold	Dec 2022	n/d	—	—	ProspectHill Group → Financial Products Group Co. Ltd (Japan)	Price never disclosed. ProspectHill had acquired the leasehold for \$51.3M in 2015. The conveyance tax stamp on the recorded deed would reveal the price.
12	Gold Coast boutique hotel (51 rooms) 2885 Kalakaua Ave — outside the district	EXCLUDED	To verify	late 2019	\$30.0M	—	—	Undisclosed → The MacNaughton Group	Formerly Aqua Lotus, and the W Honolulu before that. Sits on the Gold Coast past Kapahulu Ave — outside the Waikiki Special District, so excluded from all conclusions. Shown for orientation only.

Source-confidence ratings for each row are shown in the interactive version of this report.

— in the \$/sf column means land area was not disclosed in any source found, so no rate can be computed. Leasehold rows deliberately show no \$/sf: dividing a leasehold price by land area is not a land value.

What actually moves the number

Size and frontage, in that order. Not the year.

The size effect. Big Waikiki blocks sell at a discount per foot because the pool of buyers who can write a \$500 million check is tiny, and because a ten-acre assemblage already has its highest and best use built on it. Small corner parcels sell at a premium because they are scarce, because they complete assemblages, and because a neighbouring owner will pay more than the open market to control the lot next door.

The frontage effect. Holding size roughly constant, Kalakaua Avenue frontage and beach proximity carry the premium. The clearest read in the data: 'Alohilani's oceanfront 2.5 acres at 2490 Kalakaua cleared \$1,791/sf, while Hilton Waikiki Beach's 1.27 acres two blocks mauka at 2500 Kuhio — a *smaller* parcel, sold in the same year, by the same seller — cleared \$1,410/sf. That roughly 27% gap is location, isolated about as cleanly as this market ever offers.

THE GAP IN THE EVIDENCE

Every primary comp sits on Kalakaua or Kuhio. **There is no verified land comp in the interior Apartment Precinct** — the Ala Wai side, the residential blocks off Ena Road and Olohana Street. If your parcel is in there, this study does not price it, and anyone extrapolating the \$1,315/sf figure onto an Ala Wai lot is guessing. Interior apartment-zoned land in Waikiki should be expected to trade well below the resort corridor, but the discount is not measured here. Section 09 tells you how to close that gap.

06

Zoning

In Waikiki the precinct governs what you can build, and what you can build governs what the land is worth. Two parcels of identical size across the street from each other are not the same asset.

Every parcel in the district carries *two* layers: an underlying Land Use Ordinance zoning district, and a Waikiki Special District precinct laid over it. The precinct is usually the binding constraint, and it is the one that decides whether transient vacation units — hotel use, the highest-value use in Waikiki — are permitted as of right.

PRECINCT	HOTEL / TRANSIENT USE	WHAT IT MEANS FOR LAND VALUE
Resort Mixed Use	Permitted as of right. TVUs and B&Bs both allowed.	The premium precinct. All four primary comps sit in the resort corridor. Access to the PD-R (Planned Development – Resort) permit path, which is where the density upside lives.
Resort	Permitted as of right.	Full hotel entitlement. Values track the Resort Mixed Use precinct.
Apartment	Not as of right. Residential use; PD-A permit path only.	Materially lower land value. No hotel income to capitalise. This is the precinct with no comps in this study — treat any number applied here as unsupported.
Apartment Mixed Use	Not as of right.	Residential with limited commercial. Between Apartment and Resort in value; still unmeasured in this dataset.
Public	n/a	Parks, rights-of-way, civic. Not a market category.

HEIGHT LIMIT — DIAMOND HEAD END 220_{ft} Waikiki runs a graduated height ceiling that steps down toward Diamond Head.	HEIGHT LIMIT — ALA MOANA END 350_{ft} The Ewa end carries the tallest envelope in the district.	PD-R BASE DENSITY 4.0_{FAR} Maximum project floor area ratio under the Planned Development – Resort path.	PD-R CEILING 5.0_{FAR} Where existing FAR already exceeds 3.33, density may rise up to 20%, capped at 5.0. Above 5.0, existing FAR is the cap.
---	---	---	--

WHY THIS MATTERS TO YOUR PRICING

A land rate is really a price for buildable floor area. At 4.0 FAR, land at \$1,315/sf is \$329 per buildable square foot; at 5.0 FAR the same land is \$263. **If your parcel already carries an FAR above 5.0, that grandfathered density is the single most valuable thing about it** — existing FAR becomes your cap, and it cannot be recreated. Confirm the existing FAR before you price the land.

07

Who is selling, who is buying

And what each of these parties traded before — the five-year history behind the counterparties you'd be negotiating against.

The sell side is a small, identifiable group of Hawaiian trusts monetising legacy ground positions. Kamehameha Schools closed the \$510M Royal Hawaiian ground in November 2025, six weeks after selling roughly 500 acres under the Four Seasons Hualālai on Hawai‘i Island for about \$400M. Queen Lili‘uokalani Trust sold two Waikiki grounds in 2019 alone — ‘Alohilani at \$195M in September and Hilton Waikiki Beach at \$78M in August — under a repositioning strategy its trustees set in 2015. It has publicly stated that its remaining Waikiki position, more than four acres under the Waikiki Beach Marriott, is not for sale.

The buy side is cross-Pacific institutional capital and ground-lease specialists. Daisho (Tokyo) took the Royal Hawaiian ground. Shoei (Japan) bought the ground under its own building at the Bank of Hawaii Waikiki Center. Safehold, the ground-lease REIT founded and managed by iStar, took ‘Alohilani. On the leasehold side the pattern repeats: Mirae Asset (Seoul) bought the Hyatt Regency leasehold from Blackstone for \$755.6M in 2016; Commerz Real (Germany) took the majority of the Pacific Beach leasehold around 2017; Financial Products Group (Japan) bought the Queen Kapiolani in December 2022.

THE NEGOTIATING READ

If you are acquiring, you are most likely buying from either **a trust with a fiduciary mandate and no time pressure**, or **a family partnership holding a legacy ground position**. Neither is a distressed seller. The Bank of Hawaii ground is the instructive case: Kapuahelani LP held that dirt from 1995 to 2026 and sold it to its own lessee — the party with the most to gain from controlling it and the least ability to walk away. That is how the \$2,000/sf top of the range got set, and it is why that comp should be treated as an *upper* bound rather than a market midpoint.

Prior transaction history

ASSET	EARLIER TRADE	THEN	LATER TRADE	NOW	READ
BOH Waikiki Center ground 2155 Kalakaua Ave	1995	~\$4.0M ~\$119/sf	Mar 2026	\$67.0M \$2,000/sf	16.8× over 31 years — a 9.5% compound annual rate on raw Waikiki land.
Hyatt Regency Waikiki (leasehold) 2424 Kalakaua Ave	2013	\$445M Blackstone buys	Jun 2016	\$755.6M Mirae buys	70% gain in three years. Transferred again Sept 2025 in an undisclosed nine-figure deal; 2026 reporting put talks near \$650–680M — a real markdown from 2016.
‘Alohilani Resort 2490 Kalakaua Ave	~2017	~\$515M leasehold, Commerz Real	Sep 2019	\$195M ground, Safehold	The cleanest split in the dataset: leasehold and fee sold separately within two years. Land was ~27% of the combined capital stack.
Queen Kapiolani Hotel 150	2015	\$51.3M ProspectHill	Dec 2022	Undisclosed FPG (Japan)	Price not released. Pull the deed for the

ASSET	EARLIER TRADE		THEN	LATER TRADE		NOW	READ
Kapahulu Ave							conveyance tax stamp to infer it.
Hilton Hawaiian Village fringe Kalia Rd vicinity	2014	land + easements to Blackstone	~\$37M affil.	Mar 2023	2 parcels to Park Hotels	~\$18M	Park has been assembling at the Ewa end for an additional tower. Areas undisclosed in both trades — no rate derivable.

Apply it to your parcel

You haven't named the site, so this puts the comp set in your hands. Enter the land area and pick the position that matches; the range comes straight from the transactions above.

LAND AREA – SQUARE FEET

20000

Land area, not building area. One acre = 43,560 sf.

POSITION IN THE DISTRICT

Kuhio Ave corridor

Anchored on Hilton Waikiki Beach at 2500 Kuhio — \$78M for 1.27 acres, \$1,410/sf.

INDICATED LAND VALUE

LOW

\$23.0M

\$1,150/sf

INDICATED

\$28.0M

\$1,400/sf

HIGH

\$32.0M

\$1,600/sf

\$0

\$2,200/sf

The Kuhio corridor trades at a consistent discount to Kalakaua. This is the best-evidenced tier in the study for a mid-size parcel.

WHAT THIS NUMBER DOES NOT INCLUDE

This is **land value only**. An acquisition cost is not the same thing. Not included: any building on the site; transaction costs (title, escrow, Hawaii conveyance tax, brokerage, legal); entitlement and permitting cost and the carry to get through it; demolition and site work; tenant buyouts or relocation; and — if the site is encumbered by a ground lease — the cost of the leasehold interest, which as the ‘Alohilani history above shows can exceed the land itself by two to three times.

Verify before you rely on this

Nine lookups convert this desktop study into something an appraiser, a lender, or a partner will accept. All are public records; none cost more than a fee and an afternoon.

01 Pull the TMK and land area for every comp above.

Confirm each parcel's actual square footage rather than the acreage a reporter rounded. This alone can move a \$/sf figure by 10–15%.

City & County of Honolulu, Real Property Assessment Division – parcel search by address or TMK

02 Pull the recorded deed for each comp and read the conveyance tax stamp.

Hawaii's conveyance tax is computed on actual consideration, so the stamp confirms price — including for the Queen Kapiolani sale, where the price was never released.

State of Hawaii Bureau of Conveyances / Land Court – document search by grantor, grantee, or TMK

03 Read the ground lease on every leased-fee comp.

Rent, remaining term, reset dates, and reversion terms determine what the buyer actually paid for. Without these, the four primary comps are not strictly comparable to each other.

Recorded lease or memorandum of lease, Bureau of Conveyances

04 Confirm your own parcel's precinct and underlying zoning.

Resort Mixed Use versus Apartment is the largest single value fork in this study.

Honolulu DPP zoning map / HoLIS parcel viewer; LUO Ch. 21-9, Waikiki Special District

05 Confirm your parcel's existing FAR and height envelope.

Grandfathered density above 5.0 FAR cannot be recreated and is worth pricing separately.

Honolulu DPP; Waikiki Special District Design Guidelines

06 Close the Apartment Precinct evidence gap.

Ask a Honolulu commercial brokerage to run interior Waikiki land and apartment-building sales from the MLS and CoStar. That data is licensed and was not available for this study.

A local CRE brokerage with CoStar and Honolulu Board of Realtors access

07 Verify the two flagged rows.

The Waikiki Trade Center price and date, and the Kuhio Avenue studio-apartment assemblage sale, are each single-sourced with no confirmed land area.

RPAD parcel record plus recorded deed

08 Check for encumbrances on your target.

Easements, shoreline setback, the Waikiki Special District design review, historic designation, and any existing tenancies all reduce what you can deliver.

Preliminary title report; DPP records

09

Commission a state-certified appraisal before you commit capital.

This study is research, not an appraisal, and it is not a substitute for one.

Hawaii state-certified general appraiser with Waikiki hospitality experience
